Monarch Life Cycle Dice Game

4 Players

Summary: To introduce the life cycle sequence of the Monarch butterfly.

How to play:

Each participant receives six cards which depict the life cycle of the Monarch butterfly. The rest of the cards are placed face down in the middle of the playing area.

A total of six cards completes this sequence.

Taking turns, roll the dice. Each participant places in front of them the matching card in their hand that corresponds to the picture on the dice. If the participant rolls a card that has already played, their turn ends. If a participant does not have a matching card, they must draw a card from the card pile and a card must be discarded from the participant's hand.

Discarded cards are placed face up next to the draw pile. Next participant may choose the top discard card or choose from the draw pile.

Play continues until one participant has the complete Monarch life cycle sequence in correct order and displayed in front of them.

- 1 – Egg
- 2 – Caterpillar (larva)
- 3 – Caterpillar pupating (J-form)
- 4 – Chrysalis (pupa)
